 - Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

Item 7.01 Regulation FD Disclosure.

On July 18, 2014, CNS Response, Inc. (the “Company”) became aware that the Senate Department of Defense Appropriations Committee (“Committee”) referred to research currently being conducted at Walter Reed National Medical Center and Fort Belvoir Community Hospital using database-supported methods in order to increase the accuracy and effectiveness of prescription practices for mental health medications. The excerpted paragraph below was included on page 256 of the Department of Defense Appropriations Bill, 2015, which was passed unanimously by the Committee.

Prescription Effectiveness of Psychotropic Medications.—The Committee supports the Department’s efforts to treat patients diagnosed with behavioral health disorders and believes that recent efforts to use database-supported methods in order to increase the accuracy and effectiveness of prescription practices for mental health medications may not only achieve cost savings but also improve patient care. The Committee understands that this research is currently taking place at Walter Reed National Military Medical Center and Fort Belvoir Community Hospital and encourages its expansion to additional sites as preliminary findings have shown promising results.

SIGNATURES

Pursuant to the Securities Exchange Act of 1934, as amended, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
